Special Educational Needs And Code Of Practice Policy

As a Registered Childminder I endeavour to operate a service which is inclusive to all. I recognise that some children have special needs. As an accredited Childminder I play a crucial part in children's education.

- I will work closely with staff from other agencies such as local and community health services.
- I will work towards ensuring the best possible learning outcome for each individual child.
- I will work with parents to keep fully informed about their child's needs.

Procedures

- I will ensure the provision for a child with SEN will match the nature of their needs.
- I will record and monitor the child's needs.
- I will share information with parent & staff from other agencies as is appropriate.
- I will keep Individual Education Plans (IEPs) on children with special educational needs.
- Information on the IEPs will be discussed fully with the parents and signed by all parties.
- IEPs will be updated at point of need and reviewed termly.
- I will ensure during transition to school or other providers that appropriate information and records are transferred.
